

Education from Infancy: Part 1 - An Early Start (Paperback)

By Kerman Bharucha

Kerman Bharucha, United States, 2017. Paperback. Condition: New. Language: English. Brand new Book. "Education from Infancy: Part 1 - an Early Start" is an extract out of "Education from Infancy: All 4 Parts." "Education from Infancy Part 1 - an Early Start" describes my very successful efforts at teaching Math and literacy to my grandson from the very earliest days of his infancy. For example, by the time he was 6-7 months old I had taught him to recognize and point out to me: - upper-case letters of the alphabet; - the basic numbers 0 through 9 in normal and upside-down perspectives from his point-of-view. This book is for: - new parents, grandparents or other caretakers who want to give their infant child a huge jump-start on his or her education; - the parents of the child that needs a helping hand with an understanding of numbers in general or with addition and subtraction concepts. Part 1 ends with your child learning how to: - verbalize and write out numbers up to 36 digits long; - perform real-world addition and subtraction. This book will get your child to understand Math, and therefore enjoy it. "Education from Infancy: All 4 Parts"...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
